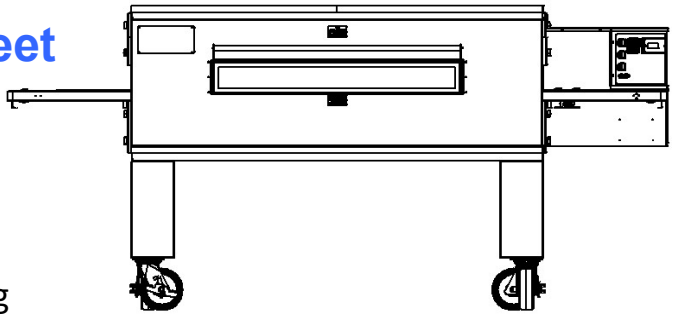
EDGE 60 Wide Body Cutsheet



E60WBMNG-1 E60WBMLP-1
E60WBMNG-2 E60WBMLP-2
E60WBMNG-3 E60WBMLP-3

General Information:

EDGE 60 Wide Body ovens are designed to Be stacked up to three high. Each oven has a 38” wide conveyor belt and a 60” long baking Chamber.

STANDARD FEATURES:

- **AFFORDABLE:** EDGE60WB ovens are affordably priced with an initial acquisition cost not much higher than a good quality reconditioned oven.
- **ENERGY EFFICIENT:** EDGE60WB ovens use a modulating burner that modulates both gas and combustion air. This system allows for the lowest overall operating costs of any conveyor oven in its class.
- **LOW OPERATING COSTS:** Overall operating costs of the EDGE60WB oven is about **$$ cents per hour** based on an oven temperature of 475 deg F, electricity costs at 10 cents per kwh, and natural gas costs at $1.30 per Ccf.
- **REMOVABLE CONTROL CABINET:** EDGE60WB control cabinet houses all the electrical and gas components except for the main motor. The control cabinet is part of the modular design and can be unbolted and returned to the factory for service or upgrades. An additional control can may be used as a spare to eliminate any costly down time.
- **CONSTRUCTION:** EDGE60WB ovens are manufactured to exacting tolerances and use stainless steel inside and out.
- **WARRANTY:** EDGE60WB ovens come with a detailed **FIVE YEAR Parts and Labor Warranty.**
- **VENTALATION:** EDGE60WB ovens must be used under a ventilation hood only. Hood system must conform to all local and applicable codes.
- **BRUSHLESS:** EDGE60WB ovens use a brushless drive conveyor system eliminating the need to replace brushes in the conveyor motors.
